SUMMARY

Cybersecurity-focused IT professional with enterprise experience in SAP security administration and quality assurance. Skilled in access management, security auditing, and compliance across Development, QA, and Production environments, resolving 20+ access issues monthly to reduce risk exposure. Currently undertaking a Master of Science in IT (Network & Cybersecurity) at Flinders University and conducting hands-on research through a dedicated home lab, including SOC automation and Zero Trust architecture implementation for IoT environments..

SKILLS

- CISCO
- PHP/HTML/CSS
- SQL
- Problem-Solving
- Time management
- MS Office Suite
- Python
- Wireshark packet analysis
- Active Directory
- Linux

PROJECTS EXPERIENCE

AI-Driven SOC Home Lab - Multi-Attack Detection & Automated Threat Intelligence

Personal Cybersecurity Project - 2026

Objective: Build a modern, AI-assisted Security Operations Center (SOC) pipeline capable of detecting real cyberattacks, generating structured alerts, and producing automated threat-intelligence insights mapped to the MITRE ATT&CK framework.

Key Achievements:

- Engineered a full SOC workflow including packet capture, detection logic, alerting, and AI-driven threat classification.
- Developed Python-based detection modules to identify SSH brute-force attacks (85k+ attempts) and ICMP flood/reconnaissance activity.
- Implemented automated JSON alert generation with source IP, packet counts, and attack metadata.
- Integrated alerts with an AI reasoning engine to produce risk scoring, confidence levels, and MITRE ATTACK mappings (e.g., T1110, T1046, T1498).

- Simulated real-world attacks using Hydra, ping flood, and hping3 to validate detection accuracy and SOC responsiveness.
- Demonstrated hands-on capability in network monitoring, detection engineering, Linux administration, and threat-intelligence automation.

Technologies Used:

• Python • Linux (Kali, Ubuntu) • Packet Capture (pcap) • JSON• Hydra • hping3 • ping flood • MITRE ATT&CK• API Integration • Network Security Monitoring • Detection Engineering

University Of Technology Mauritius – Hospital management system

Final year project - 2023

Objective: Design a modern hospital information ecosystem that reduces paper usage by 90%, strengthens data security, and delivers low-cost, trustworthy management of existing infrastructure with strategies to support clinical and administrative operations.

Key Achievements:

- Developed a digitised hospital workflow model replacing paper-based processes with secure electronic systems.
- Designed a low-cost, scalable architecture that enhances the trustworthiness and manageability of existing hospital infrastructure.
- Improved operational efficiency through centralised monitoring, automated maintenance, and optimised resource utilisation.

Technologies Used:

• PHP • MySQL • PhpMyAdmin • JavaScript • HTML/CSS • cPanel
• Database Design • Web Security Basics

WORK EXPERIENCE

SAP Admin — Accenture Mauritius (Sep 2023 – Jan 2025)

- Designed and implemented security and authorization profiles for SAP systems, ensuring compliance with company security policies.
- Managed user access, roles, and authorizations, resolving an average of 20+ authorization issues per month, reducing privilege misuse risk.
- Conducted regular SAP security audits to identify vulnerabilities and implement mitigations.
- Collaborated with clients to address security compliance requirements in Development, QA, and Production environments.

QA Tester (Intern) — Total Energies Mauritius (Apr 2022 – Jul 2022)

- Executed functional, regression, and scenario-based test cases.
- Documented and reported bugs, collaborating with developers to resolve security and functional defects.
- Created and maintained test scripts, improving testing efficiency and accuracy.

EDUCATION AND TRAINING

Masters of Science: Information and Technology(Network and Cybersecurity) | Flinders University, Adelaide | Graduating: December 2026

Bachelor of Science: Computer Science with Network Security| University of Technology, Mauritius| Graduated: December 2023

LANGUAGES

- English: Native/Trilingual
- French: Native/Trilingual
- Hindi: Native/Trilingual

ACCOMPLISHMENTS

- Runner up at UTM Mobile Application Competition (SMAC)
- Fundamentals of Digital Photography
- Fundamentals of Adobe Photoshop
